SUMMARY

DevOps & Cloud Intern at **Birlasoft** with practical experience in **AWS services**, **CI/CD automation using Jenkins**, **Infrastructure as Code with Terraform**, and containerization using **Docker and Kubernetes**. Strong understanding of cloud architecture, automation, and deployment best practices. Capable of commencing operations immediately and amenable to relocation.

EDUCATION

Bachelor of Computer Science

July 2022 – May 2025

Bishop Heber College, Trichy, India

Cumulative GPA: 8.1 / 10

SKILLS

Languages & Programming: Python, SQL

Aws Services: EC2, S3, RDS (MySQL), ALB, Route 53, ACM, Lambda, AWS Elemental MediaConvert, Cognito

DevOps Tools: Jenkins, Terraform, Docker, Kubernetes, Ansible, Git/GitHub, Linux

Databases & Tools: MySQL, Jupyter Notebook, Git/GitHub, VS Code

Cloud: Basics of Azure, Amazon Web Services

Key Competencies: ETL(Extract, Transform, Load), System Design, Software Development Lifecycle

WORK EXPERIENCE

Birlasoft

Coimbatore, TN

ICTS Intern (Apprenticeship)

Oct 2025 – Current

Infrastructure & DevOps Bootcamp

- Designed and deployed a **cloud-based OTT streaming platform** using **AWS (EC2, S3, RDS, ALB, Route 53, Lambda, MediaConvert, Cognito)**.
- Implemented **Infrastructure as Code** using **Terraform (300+ lines)** to provision a **multi-AZ architecture** with VPC, **6 subnets**, EC2, ALB, and RDS with read replica.
- Built **CI/CD pipelines using Jenkins and GitHub** and automated configuration and backups with **Ansible**, reducing manual effort by **80 %**.
- Developed an **event-driven media pipeline** using **S3 + Lambda + MediaConvert**, achieving **100% automated video transcoding** to MP4.
- Gained hands-on experience with **Jenkins, Terraform, Docker, Kubernetes, Ansible, and Linux (Ubuntu)** following cloud security best practices.

Common Service Center

Trichy, TN

Customer and Tech Support

Dec 2022 – Jan 2025

- Gained experience **collaborating with individuals** and local teams to deliver citizen services and process over **500+ online applications** in a self-driven manner.
- Demonstrated **strong analytical thinking** by reviewing, verifying, and processing government forms with high accuracy.
- Thrived in a **fast-paced environment**, consistently **taking initiative** with a **curious mindset** to improve service delivery.

TECHNICAL PROJECTS

- **Video Streaming Platform (AWS, Wordpress, DevOps Tools):** Built a scalable OTT platform during Birlasoft's DevOps Bootcamp using **AWS, Terraform, Jenkins, and Ansible**, automating infrastructure provisioning (**15+ resources**) and video processing via **S3, Lambda, and MediaConvert**, achieving **100% automated media workflows** and high availability.
- **Spotify Track Data Pipeline(Python, Pandas, Matplotlib, MySQL):** To improve my backend and data processing skills, Conceived and **built a custom ETL pipeline** fetching audio features via Spotipy API, **transforming records with Pandas**. Stored structured data in MySQL and **visualized trends using Matplotlib** to identify track behavior patterns. **Strengthened understanding of API integration** and accelerated **query performance for 2,000+ tracks**.
- **Netflix Data Pipeline (Azure Data Factory, Databricks, PySpark, Synapse):** Built an **ETL pipeline** for real-time and batch ingestion using **Azure Data Factory and Databricks**. Applied **PySpark transformations, Autoloader for 100k+ records/day**, and Unity Catalog for governance. Integrated Azure Synapse for analytics and **automated workflows with Delta Live Tables**, optimizing queries on 10GB+ datasets.
